### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Todd N. Hathaway on September 25, 2006.

The application has been amended as follows:

In claim 23, in line 8 after "said flange portion having" deleted "a bore formed through said flange portion around an axis that extends generally perpendicular to an axis of said screw and socket portions, " and replaced with --an opening--.

In claim 23, in line 21 after "members are tightened" deleted "together. " and replaced with --together; wherein said opening for attachment of a load comprises:

a bore formed through said flange portion around an axis that extends generally perpendicular to an axis of said screw and socket portions. --.

In claim 25, in line 1 before "wherein said opening" deleted "The connector assembly of claim 23, " and replaced with --A connector assembly for use with a tarp, said connector assembly comprising:

male and female connector members, each said connector member comprising:

a base portion having a broad, generally flat bearing face for engaging material of a tarp; and

a flange portion that extends from said base portion opposite and generally normal to said bearing face for being gripped between and rotated by the fingers of a hand, said flange portion having an opening for attachment of a load thereto;

said male connector member further comprising:

a threaded screw portion extending normal to said bearing face thereof, said screw portion having a tapered, sharply pointed tip for piercing material of a tarp; and

said female connector member further comprising:

a threaded socket portion extending normal to said bearing face thereof for receiving said screw portion of said male connector member in threaded engagement therewith, said socket portion being recessed into said bearing face of said female connector member so that said bearing faces of said male and female connector members are able to meet in substantially face-to-face contact when said connector members are tightened together; --.
